

Based on revolutionary Front-End & Back-End technology

Medivision Gold Retail Features

MediVision Gold Retail is specially developed for medical retail shops, pharmacies or medical/drug stores. It covers every aspect of medical retail business. It includes all features for online billing, inventory management and accounting up to finalization.

- * Thousands of satisfied users
- * Product is being developed for more than 12 years and is still developed continuously
- * A windows based product developed using self-developed front-end & back-end technology. Does not require any other database license to use, thus saving you from additional cost or fear of using pirated database or a database with limitations.
- * Self-developed back-end offers superb speed & tamper-proof data security. No one can open, view, modify data outside the program – preventing frauds in your shop.
- * Online (Internet based chat/Email/Remote Access) & Telephonic support through our dedicated call centre
- * Very simple to use. No computer course is required. Workers in your shop can start using it within a few minutes.
- * Numerous short cut keys for quick operations. Helps to handle many customers during rush hours.
- * Includes features to enable to handle multiple customers on one computer.
- * Includes almost everything that is required to effectively manage a retail medical store.
- * Numerous features & check-points are programmed into software to avoid/minimize losses at the time of purchase, sale, expiry claims, multiple mrp stock of same product, near expiry of similar drug, un-settled claims, purchase order and other operations.
